DIPLOMA EXAMINATION IN ENGINEERING/TECHNOLOGY/ MANAGEMENT/COMMERCIAL PRACTICE — OCTOBER, 2019

OPTICAL FIBRE COMMUNICATION

[Time: 3 hours

(Maximum marks: 100)

PART — A

(Maximum marks: 10)

Marks

- I Answer all questions in one or two sentences. Each question carries 2 marks.
 - 1. Define Numerical Aperture.
 - 2. Describe absorption.
 - 3. Draw the structure of Surface Emmitting LED.
 - 4. Draw the Block diagram of Optical receiver.
 - 5. Describe dispersion.

 $(5 \times 2 = 10)$

PART — B

(Maximum marks: 30)

- II Answer any five of the following questions. Each question carries 6 marks.
 - 1. Explain Fiber Bend Losses.
 - 2. Briefly explain the Skew rays and Meridional rays.
 - 3. Briefly explain advantages of Erbium Doped Fiber Amplifier.
 - 4. Explain the structure and working principle of PIN photo diode.
 - 5. Explain optical fiber communication system.
 - 6. Briefly explain Optical Modulators.
 - 7. Explain the theory of Laser action.

 $(5 \times 6 = 30)$

8

Marks PART — C (Maximum marks: 60) (Answer one full question from each unit. Each full question carries 15 marks.) Unit — I III Explain various Optical Fiber types. 8 Briefly explain the advantages of Optical Fiber. 7 OR IV Describe total internal reflection and acceptance angle. 9 Briefly explain the optical fiber configurations and Modes. 6 Unit — II Explain the Modulation of LED. 7 Explain the structure and working principle of Avalanche photo diode. 8 OR VI Briefly explain different types of LED Structures. 12 Explain the principle of Photo detection. 3 Unit — III VII Briefly explain the Wave length Division Multiplexing. 9 Explain the basic concept of optical Amplifiers. 6 OR VIII Explain Optical Transmitters and Optical Receivers. 8 (b) Explain the working principle of Erbium Doped Fiber Amplifier. (EDFA) 7 Unit — IV IX Explain intra and inter mode dispersion losses in optical transmission. 8 Explain the principle of Optical fiber directional coupler. 7 X Explain the cut back method of measurement of attenuation losses in optical transmission. 7

(b) Describe Optical isolators and optical circulators.
